

Discover Gliding in Romania

Kings Land Ineu airfield & resort

Kings Land Resort

“Kings Land” Airfield is part of “Kings Land Resort” complex at Ineu de Cris, close to Oradea city and about 30 km away from the western border of Romania to Hungary

The Restaurant

Spacious restaurant with lakeside tables, excellent food, quiet and relaxing atmosphere, but just opened at week ends. But there are also many other restaurants in the vicinity of the airfield and the city

The Golf Course

Golf Course with 6 holes, driving range, putting area and a club house next to the airfield
A qualified golf instructor is also available if needed

The Horse Stable

Horse stable with Friesian horses

Posibility to ride on horse-polo pitch for beginners or take a trip trough the wonderful countryside for more advanced riders. Riding Instructors are also available

The Lakes

Three lakes invite you to go fishing, swimming, boating, driving a jet ski or just relax beside them

Accommodation

Bungalows on the lakeside with 2 beds, electricity, outside table and grill.
Space for camping is also available at the resort area - new showers are under construction!

Some good hotels and pensions are in the area of the airfield - we assist with giving advices and booking

The Airfield

The “Kings Land” airfield is the best place for nice flights all over the romanian mountains and also hungarian flatlands. The quite relaxing atmosphere makes it a perfect airfield for gliding holidays as well as for competition training

Airfield Details:

Runway: 15/33 750x40m Grass

PPR

max. 5,7t MTOW

Avgas and Autofuel on request available

Romania Gliding Paradise

The flying :

General flying conditions all over Romania are pretty good. The continental location of Romania produces some very good and long flying days. Cloudbases are very high sometimes, what makes sightseeing in the high mountains a breathtaking experience.

The area around the airfield offers landscape also for beginners as for advanced pilots, from flatland to high mountains. The gliding season starts in march and lasts until september.

Aerotow is possible all the season after previos contact before your arrival. At the moment we use a Cessna 182 for towing, we hope to purchase a second towplane in 2015.

Two national records are flown from Kings Land Ineu airfield:

- longest free distance 909 km (111 km/h) – Patrick Puskeiler with a Discus 2a
- fastest free distance flight 153.9km/h (395 km) – Patrick Puskeiler with a Nimbus 4

The infrastructure :

Some Place for trailer and glider parking with water and electricity

Limited space in the hangar

Cessna 182 towplane

On request aircraft and gliders for rent

Clubhouse with radio and WIFI

Romania Gliding Paradise

The airspace :

Uncomplicated airspace nearly all over the country is a big advantage of Romania. Only a few CTR's are not allowed to be entered by gliders without XPDR and the military areas are just activated sometimes. For every cross country flight in Romania a flightplan has to be filed. This sounds more complicated than it is and will be made by the airfield administrators at Kings Land Airfield. Flights to Hungary are also possible on most of the days.

Budapest

Kingsland Airfield

Beograd

Season 2015

Prices:
